Find the magnitude of vector <6, 8>.

Add: <1,-4> + <-3,-3>

Find the dot product of <-4,2> and <-1,2>.

Find the magnitude of vector <3, 4>.

Add: <3,-4> + <1,2>

Find the dot product of <-4,2> and <-2,-2>.

Find the magnitude of vector <5, 12>.

Add: <3,-3> + <-2,0>

Introduction to Vectors · 2

ANSWER

<-2, -7>

Introduction to Vectors · 1

ANSWER

10

Introduction to Vectors · 4

ANSWER

5

Introduction to Vectors · 3

ANSWER

8

Introduction to Vectors · 6

ANSWER

4

Introduction to Vectors · 5

ANSWER

<4, -2>

Introduction to Vectors · 8

ANSWER

<1, -3>

Introduction to Vectors · 7

ANSWER

13

Find the magnitude of vector <8, 15>.

Add: <3,-5> + <-2,-5>

Find the dot product of <-5,-3> and <4,-2>.

Add: <1,4> + <3,0>

Find the dot product of <-4,-5> and <-2,5>.

Find the magnitude of vector <8, 6>.

Add: <1,-3> + <4,-1>

Find the magnitude of vector <7, 24>.

Introduction to Vectors · 10

ANSWER

<1, -10>

Introduction to Vectors · 9

ANSWER

17

Introduction to Vectors · 12

ANSWER

<4, 4>

Introduction to Vectors · 11

ANSWER

-14

Introduction to Vectors · 14

ANSWER

10

Introduction to Vectors · 13

ANSWER

-17

Introduction to Vectors · 16

ANSWER

25

Introduction to Vectors · 15

ANSWER

<5, -4>

Add: <6,-2> + <0,-6>

Find the dot product of <-5,6> and <-2,1>.

Find the magnitude of vector <15, 8>.

Add: <-4,-1> + <0,4>

Find the dot product of <-6,-1> and <-5,-1>.

Find the magnitude of vector <12, 5>.

Add: <3,-4> + <-5,-4>

Find the magnitude of vector <4, 3>.

Introduction to Vectors · 18

ANSWER

16

Introduction to Vectors · 17

ANSWER

<6, -8>

Introduction to Vectors · 20

ANSWER

<-4, 3>

Introduction to Vectors · 19

ANSWER

17

Introduction to Vectors · 22

ANSWER

13

Introduction to Vectors · 21

ANSWER

31

Introduction to Vectors · 24

ANSWER

5

Introduction to Vectors · 23

ANSWER

<-2, -8>
