One-Step Equations · 1

$$n + 9 = 16.75$$

One-Step Equations · 2

$$a + \frac{1}{6} = \frac{5}{6}$$

One-Step Equations · 3

$$12x = 72$$

One-Step Equations · 4

$$\frac{k}{26} = 19$$

One-Step Equations · 5

$$a + \frac{1}{3} = \frac{2}{3}$$

One-Step Equations · 6

$$10k = 15$$

One-Step Equations · 7

After spending 6 dollars, Leo has 53 dollars left. Solve m - 6 = 53 to find how many dollars m he started with.

One-Step Equations · 8

$$k + \frac{1}{3} = \frac{2}{3}$$

One-Step Equations · 2

ANSWER

$$a = \frac{2}{3}$$

One-Step Equations · 1

ANSWER

$$n = 7.75$$

One-Step Equations · 4

ANSWER

$$k = 494$$

One-Step Equations · 3

ANSWER

$$x = 6$$

One-Step Equations · 6

ANSWER

$$k = 1.5$$

One-Step Equations · 5

ANSWER

$$a = \frac{1}{3}$$

One-Step Equations · 8

ANSWER

$$k = \frac{1}{3}$$

One-Step Equations · 7

ANSWER

$$m = 59$$

One-Step Equations · 9

$$2x = 9$$

One-Step Equations · 10

$$y + \frac{1}{2} = \frac{7}{8}$$

One-Step Equations · 11

$$2m = 18$$

One-Step Equations · 12

$$\frac{y}{19} = 5$$

One-Step Equations · 13

$$\left(\frac{3}{5}\right)k = 15$$

One-Step Equations · 14

$$x - 8.75 = 5.4$$

One-Step Equations · 15

A pizza was cut into equal slices, and each of 6 friends got 2 slices. Solve $\frac{s}{6} = 2$ to find the number of slices s.

One-Step Equations · 16

$$x + \frac{1}{8} = \frac{3}{8}$$

One-Step Equations · 10

ANSWER

$$y = \frac{3}{8}$$

One-Step Equations · 9

ANSWER

$$x = 4.5$$

One-Step Equations · 12

ANSWER

$$y = 95$$

One-Step Equations · 11

ANSWER

$$m = 9$$

One-Step Equations · 14

ANSWER

$$x = 14.15$$

One-Step Equations · 13

ANSWER

$$k = 25$$

One-Step Equations · 16

ANSWER

$$x = \frac{1}{4}$$

One-Step Equations · 15

ANSWER

$$s = 12$$

One-Step Equations · 17

$$k + 5 = 6.25$$

One-Step Equations · 18

$$x + \frac{2}{3} = \frac{5}{6}$$

One-Step Equations · 19

$$10a = 100$$

One-Step Equations · 20

$$\frac{a}{4} = 6$$

One-Step Equations · 21

$$\frac{3}{8}k = 9$$

One-Step Equations · 22

$$x + 1.1 = 3.35$$

One-Step Equations · 23

Tickets cost 18 dollars each. Maya paid 216 dollars. Solve $18t = 216$ to find the number of tickets t.

One-Step Equations · 24

$$y + \frac{1}{3} = \frac{2}{3}$$

One-Step Equations · 18

ANSWER

$$x = \frac{1}{6}$$

One-Step Equations · 17

ANSWER

$$k = 1.25$$

One-Step Equations · 20

ANSWER

$$a = 24$$

One-Step Equations · 19

ANSWER

$$a = 10$$

One-Step Equations · 22

ANSWER

$$x = 2.25$$

One-Step Equations · 21

ANSWER

$$k = 24$$

One-Step Equations · 24

ANSWER

$$y = \frac{1}{3}$$

One-Step Equations · 23

ANSWER

$$t = 12$$
