Task card 1 Rows, Columns & Squares

Count the squares in each row, then add the rows: ___ + ___ + ___ + ___ + ___ = ? How many squares in all?

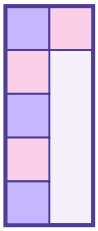

Task card 2 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

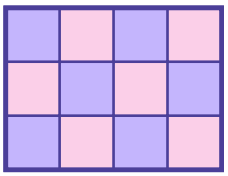

Task card 3 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

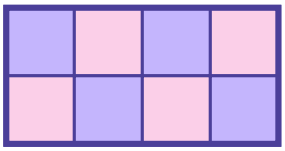

Task card 4 Rows, Columns & Squares

This rectangle has 3 rows. If you add 1 more row of the same size, how many squares will there be in all?

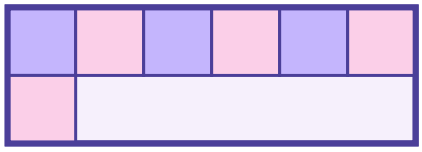

Task card 5 Rows, Columns & Squares

This rectangle has 2 rows. If you add 1 more row of the same size, how many squares will there be in all?

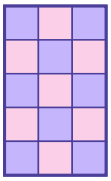

Task card 6 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

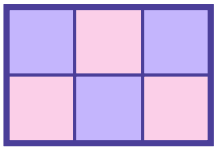

Task card 7 Rows, Columns & Squares

This rectangle has 5 rows. If you add 1 more row of the same size, how many squares will there be in all?

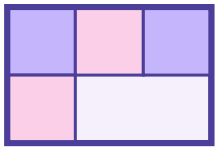

Task card 8 Rows, Columns & Squares

This rectangle has 2 rows. If you add 1 more row of the same size, how many squares will there be in all?

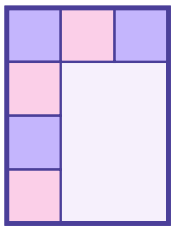

Task card 9 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

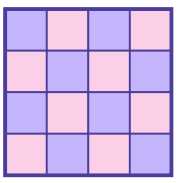

Task card 10 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

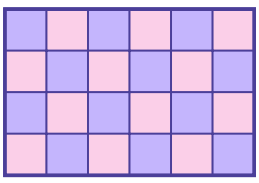

Task card 11 Rows, Columns & Squares

This rectangle has 4 rows. If you add 1 more row of the same size, how many squares will there be in all?

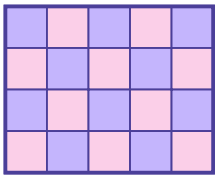

Task card 12 Rows, Columns & Squares

This rectangle has 4 rows. If you add 1 more row of the same size, how many squares will there be in all?

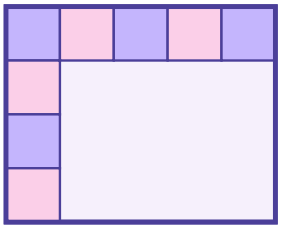

Task card 13 Rows, Columns & Squares

Count the squares in each row, then add the rows: ___ + ___ + ___ + ___ = ? How many squares in all?

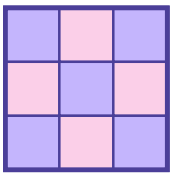

Task card 14 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

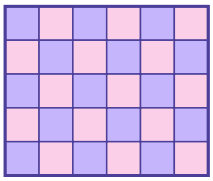

Task card 15 Rows, Columns & Squares

This rectangle has 3 rows. If you add 1 more row of the same size, how many squares will there be in all?

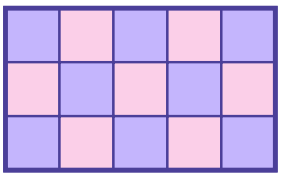

Task card 16 Rows, Columns & Squares

This rectangle has 5 rows. If you add 1 more row of the same size, how many squares will there be in all?

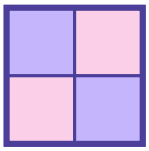

Task card 17 Rows, Columns & Squares

Count the squares in each row, then add the rows: ___ + ___ + ___ = ? How many squares in all?

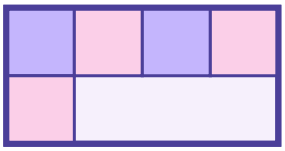

Task card 18 Rows, Columns & Squares

This rectangle has 2 rows. If you add 1 more row of the same size, how many squares will there be in all?

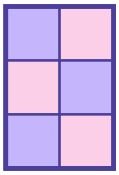

Task card 19 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

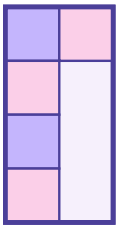

Task card 20 Rows, Columns & Squares

Count the squares in each row, then add the rows: ___ + ___ + ___ = ? How many squares in all?

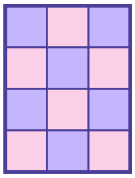

Task card 21 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

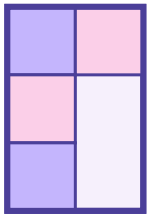

Task card 22 Rows, Columns & Squares

This rectangle has 4 rows. If you add 1 more row of the same size, how many squares will there be in all?

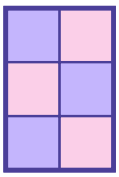

Task card 23 Rows, Columns & Squares

Only the first row and the first column are drawn. If the whole rectangle is filled with same-size squares, how many squares will there be?

Task card 24 Rows, Columns & Squares

This rectangle has 3 rows. If you add 1 more row of the same size, how many squares will there be in all?

Rows, Columns & Squares Task Cards

Recording sheet · Grade 2 · Look at the rectangle. Count rows, columns or squares.
