Equations with Variables on Both Sides · 1

$$2x + 7 = 3x + 3$$

Equations with Variables on Both Sides · 2

$$4x - 10 = 3x - 7$$

Equations with Variables on Both Sides · 3

$$x + 10 = 3x + 4$$

Equations with Variables on Both Sides · 4

$$4x - 7 = x - 16$$

Equations with Variables on Both Sides · 5

$$4x = 3x - 3$$

Equations with Variables on Both Sides · 6

$$x + 11 = 3x + 9$$

Equations with Variables on Both Sides · 7

$$3x - 7 = x - 7$$

Equations with Variables on Both Sides · 8

$$4x - 4 = 3x$$

Equations with Variables on Both Sides · 2

ANSWER

$x = 3$

Equations with Variables on Both Sides · 1

ANSWER

$x = 4$

Equations with Variables on Both Sides · 4

ANSWER

$x = -3$

Equations with Variables on Both Sides · 3

ANSWER

$x = 3$

Equations with Variables on Both Sides · 6

ANSWER

$x = 1$

Equations with Variables on Both Sides · 5

ANSWER

$x = -3$

Equations with Variables on Both Sides · 8

ANSWER

$x = 4$

Equations with Variables on Both Sides · 7

ANSWER

$x = 0$

Equations with Variables on Both Sides · 9

$$4x + 10 = 5x + 11$$

Equations with Variables on Both Sides · 10

$$5x + 9 = 4x + 4$$

Equations with Variables on Both Sides · 11

$$5x - 7 = 2x - 19$$

Equations with Variables on Both Sides · 12

$$3x + 13 = 5x + 5$$

Equations with Variables on Both Sides · 13

$$x + 2 = 5x - 2$$

Equations with Variables on Both Sides · 14

$$3x + 6 = 2x + 8$$

Equations with Variables on Both Sides · 15

$$x + 7 = 3x - 3$$

Equations with Variables on Both Sides · 16

$$x - 15 = 2x - 13$$

Equations with Variables on Both Sides · 10

ANSWER

$x = -5$

Equations with Variables on Both Sides · 9

ANSWER

$x = -1$

Equations with Variables on Both Sides · 12

ANSWER

$x = 4$

Equations with Variables on Both Sides · 11

ANSWER

$x = -4$

Equations with Variables on Both Sides · 14

ANSWER

$x = 2$

Equations with Variables on Both Sides · 13

ANSWER

$x = 1$

Equations with Variables on Both Sides · 16

ANSWER

$x = -2$

Equations with Variables on Both Sides · 15

ANSWER

$x = 5$

$$-2x + 15 = -3x + 17$$

$$-3(x - 9) = -5x + 19$$

$$6x - 13 = -3x - 22$$

$$(x + 2) = 6x - 18$$

$$-4x - 4 = -5x - 3$$

$$2(x - 6) = 6x + 4$$

$$x - 5 = -2x + 7$$

$$-2(x - 1) = -5x + 17$$

Equations with Variables on Both Sides · 18

ANSWER

$x = -4$

Equations with Variables on Both Sides · 17

ANSWER

$x = 2$

Equations with Variables on Both Sides · 20

ANSWER

$x = 4$

Equations with Variables on Both Sides · 19

ANSWER

$x = -1$

Equations with Variables on Both Sides · 22

ANSWER

$x = -4$

Equations with Variables on Both Sides · 21

ANSWER

$x = 1$

Equations with Variables on Both Sides · 24

ANSWER

$x = 5$

Equations with Variables on Both Sides · 23

ANSWER

$x = 4$
