Task card 1 — Probability of Compound Events

Event A: probability = $\frac{2}{5}$. Event B: probability = $\frac{1}{3}$. If A and B are independent, find P(A and B).

Task card 2 — Probability of Compound Events

Event A: probability = $\frac{1}{4}$. Event B: probability = $\frac{3}{5}$. If A and B are independent, find P(A and B).

Task card 3 — Probability of Compound Events

Event A: probability = $\frac{3}{4}$. Event B: probability = $\frac{1}{2}$. If A and B are independent, find P(A and B).

Task card 4 — Probability of Compound Events

Event A: probability = $\frac{1}{3}$. Event B: probability = $\frac{1}{2}$. If A and B are independent, find P(A and B).

Task card 5 — Probability of Compound Events

Event A: probability = $\frac{1}{2}$. Event B: probability = $\frac{1}{3}$. If A and B are independent, find P(A and B).

Task card 6 — Probability of Compound Events

Event A: probability = $\frac{1}{3}$. Event B: probability = $\frac{1}{4}$. If A and B are independent, find P(A and B).

Task card 7 — Probability of Compound Events

Event A: probability = $\frac{1}{2}$. Event B: probability = $\frac{1}{2}$. If A and B are independent, find P(A and B).

Task card 8 — Probability of Compound Events

Event A: probability = $\frac{4}{5}$. Event B: probability = $\frac{3}{4}$. If A and B are independent, find P(A and B).

Task card 9 — Probability of Compound Events

Event A: probability = $\frac{1}{3}$. Event B: probability = $\frac{3}{4}$. If A and B are independent, find P(A and B).

Task card 10 — Probability of Compound Events

Event A: probability = $\frac{3}{5}$. Event B: probability = $\frac{2}{3}$. If A and B are independent, find P(A and B).

Task card 11 — Probability of Compound Events

Event A: probability = $\frac{1}{4}$. Event B: probability = $\frac{1}{4}$. If A and B are independent, find P(A and B).

Task card 12 — Probability of Compound Events

Event A: probability = $\frac{2}{4}$. Event B: probability = $\frac{1}{5}$. If A and B are independent, find P(A and B).

Task card 13 Probability of Compound Events

Event A: probability = $\frac{3}{5}$. Event B: probability = $\frac{3}{4}$. If A and B are independent, find P(A and B).

Task card 14 Probability of Compound Events

Event A: probability = $\frac{2}{3}$. Event B: probability = $\frac{3}{5}$. If A and B are independent, find P(A and B).

Task card 15 Probability of Compound Events

Event A: probability = $\frac{2}{3}$. Event B: probability = $\frac{1}{4}$. If A and B are independent, find P(A and B).

Task card 16 Probability of Compound Events

Event A: probability = $\frac{3}{4}$. Event B: probability = $\frac{1}{3}$. If A and B are independent, find P(A and B).

Task card 17 Probability of Compound Events

Event A: probability = $\frac{1}{4}$. Event B: probability = $\frac{1}{2}$. If A and B are independent, find P(A and B).

Task card 18 Probability of Compound Events

Event A: probability = $\frac{2}{3}$. Event B: probability = $\frac{2}{6}$. If A and B are independent, find P(A and B).

Task card 19 Probability of Compound Events

Event A: probability = $\frac{3}{6}$. Event B: probability = $\frac{4}{6}$. If A and B are independent, find P(A and B).

Task card 20 Probability of Compound Events

Event A: probability = $\frac{3}{5}$. Event B: probability = $\frac{1}{2}$. If A and B are independent, find P(A and B).

Task card 21 Probability of Compound Events

Event A: probability = $\frac{4}{6}$. Event B: probability = $\frac{2}{3}$. If A and B are independent, find P(A and B).

Task card 22 Probability of Compound Events

Event A: probability = $\frac{1}{4}$. Event B: probability = $\frac{1}{5}$. If A and B are independent, find P(A and B).

Task card 23 Probability of Compound Events

Event A: probability = $\frac{1}{2}$. Event B: probability = $\frac{4}{5}$. If A and B are independent, find P(A and B).

Task card 24 Probability of Compound Events

Event A: probability = $\frac{4}{5}$. Event B: probability = $\frac{2}{3}$. If A and B are independent, find P(A and B).

Probability of Compound Events Task Cards

Recording sheet · Grade 7 · Find the probability. Write your answer as a fraction in simplest form.

Name: _____ Date: _____

Scan to check your answers

1	2	3	4
5	6	7	8
9	10	11	12
13	14	15	16
17	18	19	20
21	22	23	24

Probability of Compound Events Task Cards: Answer Key

Grade 7 · Medium
