Fractions to Terminating & Repeating Decimals · 1

Write $\frac{39}{50}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 2

Write $-\frac{7}{9}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 3

Is the decimal form of $\frac{14}{30}$ terminating or repeating?

Fractions to Terminating & Repeating Decimals · 4

Write $-1\frac{3}{7}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 5

Write $4\frac{7}{10}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 6

Write $-\frac{8}{15}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 7

Is the decimal form of $\frac{31}{40}$ terminating or repeating?

Fractions to Terminating & Repeating Decimals · 8

Write $1\frac{4}{5}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 2

ANSWER

-0.(7)

Fractions to Terminating & Repeating Decimals · 1

ANSWER

0.78

Fractions to Terminating & Repeating Decimals · 4

ANSWER

-1.(428571)

Fractions to Terminating & Repeating Decimals · 3

ANSWER

Repeating

Fractions to Terminating & Repeating Decimals · 6

ANSWER

-0.5(3)

Fractions to Terminating & Repeating Decimals · 5

ANSWER

4.7

Fractions to Terminating & Repeating Decimals · 8

ANSWER

1.8

Fractions to Terminating & Repeating Decimals · 7

ANSWER

Terminating

Write $\frac{1}{5}$ as a decimal.

Write $2\frac{2}{3}$ as a decimal.

Is the decimal form of $\frac{22}{80}$ terminating or repeating?

Write $\frac{2}{5}$ as a decimal.

Write $1\frac{1}{2}$ as a decimal.

Write $1\frac{3}{11}$ as a decimal.

Is the decimal form of $\frac{6}{22}$ terminating or repeating?

Write $\frac{18}{25}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 10

ANSWER

2.(6)

Fractions to Terminating & Repeating Decimals · 9

ANSWER

0.2

Fractions to Terminating & Repeating Decimals · 12

ANSWER

0.4

Fractions to Terminating & Repeating Decimals · 11

ANSWER

Terminating

Fractions to Terminating & Repeating Decimals · 14

ANSWER

1.(27)

Fractions to Terminating & Repeating Decimals · 13

ANSWER

1.5

Fractions to Terminating & Repeating Decimals · 16

ANSWER

0.72

Fractions to Terminating & Repeating Decimals · 15

ANSWER

Repeating

Write $-\frac{19}{20}$ as a decimal.

Write $\frac{1}{3}$ as a decimal.

Is the decimal form of $\frac{3}{16}$ terminating or repeating?

Write $\frac{2}{7}$ as a decimal.

Write $\frac{1}{2}$ as a decimal.

Write $-1\frac{1}{3}$ as a decimal.

Is the decimal form of $\frac{1}{15}$ terminating or repeating?

Write $-1\frac{5}{7}$ as a decimal.

Fractions to Terminating & Repeating Decimals · 18

ANSWER

0.(3)

Fractions to Terminating & Repeating Decimals · 17

ANSWER

-0.95

Fractions to Terminating & Repeating Decimals · 20

ANSWER

0.(285714)

Fractions to Terminating & Repeating Decimals · 19

ANSWER

Terminating

Fractions to Terminating & Repeating Decimals · 22

ANSWER

-1.(3)

Fractions to Terminating & Repeating Decimals · 21

ANSWER

0.5

Fractions to Terminating & Repeating Decimals · 24

ANSWER

-1.(714285)

Fractions to Terminating & Repeating Decimals · 23

ANSWER

Repeating
