Solving Quadratic Equations Using Square Roots · 1

$x^2 = 25$

Solving Quadratic Equations Using Square Roots · 2

$3x^2 - 18 = -15$

Solving Quadratic Equations Using Square Roots · 3

$x^2 = 9$

Solving Quadratic Equations Using Square Roots · 4

$(x - 9)^2 = 1$

Solving Quadratic Equations Using Square Roots · 5

$x^2 = 1$

Solving Quadratic Equations Using Square Roots · 6

$3x^2 + 20 = 47$

Solving Quadratic Equations Using Square Roots · 7

$x^2 = 16$

Solving Quadratic Equations Using Square Roots · 8

$(x - 6)^2 = 1$

Solving Quadratic Equations Using Square Roots · 2

ANSWER

$x = -1$ or $x = 1$

Solving Quadratic Equations Using Square Roots · 1

ANSWER

$x = -5$ or $x = 5$

Solving Quadratic Equations Using Square Roots · 4

ANSWER

$x = 8$ or $x = 10$

Solving Quadratic Equations Using Square Roots · 3

ANSWER

$x = -3$ or $x = 3$

Solving Quadratic Equations Using Square Roots · 6

ANSWER

$x = -3$ or $x = 3$

Solving Quadratic Equations Using Square Roots · 5

ANSWER

$x = -1$ or $x = 1$

Solving Quadratic Equations Using Square Roots · 8

ANSWER

$x = 5$ or $x = 7$

Solving Quadratic Equations Using Square Roots · 7

ANSWER

$x = -4$ or $x = 4$

Solving Quadratic Equations Using Square Roots · 9

$x^2 = 36$

Solving Quadratic Equations Using Square Roots · 10

$3x^2 - 20 = 88$

Solving Quadratic Equations Using Square Roots · 11

$x^2 = 49$

Solving Quadratic Equations Using Square Roots · 12

$(x + 3)^2 = 1$

Solving Quadratic Equations Using Square Roots · 13

$2x^2 + 3 = 75$

Solving Quadratic Equations Using Square Roots · 14

$(x + 7)^2 = 1$

Solving Quadratic Equations Using Square Roots · 15

$5x^2 + 16 = 36$

Solving Quadratic Equations Using Square Roots · 16

$(x - 1)^2 = 64$

Solving Quadratic Equations Using Square Roots · 10

ANSWER

$x = -6$ or $x = 6$

Solving Quadratic Equations Using Square Roots · 9

ANSWER

$x = -6$ or $x = 6$

Solving Quadratic Equations Using Square Roots · 12

ANSWER

$x = -4$ or $x = -2$

Solving Quadratic Equations Using Square Roots · 11

ANSWER

$x = -7$ or $x = 7$

Solving Quadratic Equations Using Square Roots · 14

ANSWER

$x = -8$ or $x = -6$

Solving Quadratic Equations Using Square Roots · 13

ANSWER

$x = -6$ or $x = 6$

Solving Quadratic Equations Using Square Roots · 16

ANSWER

$x = -7$ or $x = 9$

Solving Quadratic Equations Using Square Roots · 15

ANSWER

$x = -2$ or $x = 2$

Solving Quadratic Equations Using Square Roots · 17

$4(x + 6)^2 + 4 = 8$

Solving Quadratic Equations Using Square Roots · 18

$5x^2 - 2 = 18$

Solving Quadratic Equations Using Square Roots · 19

$(x - 7)^2 = 25$

Solving Quadratic Equations Using Square Roots · 20

$4(x + 7)^2 + 9 = 45$

Solving Quadratic Equations Using Square Roots · 21

$5x^2 - 16 = 4$

Solving Quadratic Equations Using Square Roots · 22

$(x + 5)^2 = 4$

Solving Quadratic Equations Using Square Roots · 23

$x^2 = 4$

Solving Quadratic Equations Using Square Roots · 24

$4x^2 + 14 = 50$

Solving Quadratic Equations Using Square Roots · 18

ANSWER

$x = -2$ or $x = 2$

Solving Quadratic Equations Using Square Roots · 17

ANSWER

$x = -7$ or $x = -5$

Solving Quadratic Equations Using Square Roots · 20

ANSWER

$x = -10$ or $x = -4$

Solving Quadratic Equations Using Square Roots · 19

ANSWER

$x = 2$ or $x = 12$

Solving Quadratic Equations Using Square Roots · 22

ANSWER

$x = -7$ or $x = -3$

Solving Quadratic Equations Using Square Roots · 21

ANSWER

$x = -2$ or $x = 2$

Solving Quadratic Equations Using Square Roots · 24

ANSWER

$x = -3$ or $x = 3$

Solving Quadratic Equations Using Square Roots · 23

ANSWER

$x = -2$ or $x = 2$
