Solving Quadratic Equations Using Square Roots · 1

$3(x + 5)^2 - 15 = 285$

Solving Quadratic Equations Using Square Roots · 2

$x^2 = 61$

Solving Quadratic Equations Using Square Roots · 3

$(x + 4)^2 = 4$

Solving Quadratic Equations Using Square Roots · 4

$(x + 1)^2 = 96$

Solving Quadratic Equations Using Square Roots · 5

$2(x + 3)^2 - 14 = 36$

Solving Quadratic Equations Using Square Roots · 6

$x^2 = 99$

Solving Quadratic Equations Using Square Roots · 7

$(x + 6)^2 = 4$

Solving Quadratic Equations Using Square Roots · 8

$(x + 6)^2 = 13$

Solving Quadratic Equations Using Square Roots · 2

ANSWER

$x = -7.8$ or $x = 7.8$

Solving Quadratic Equations Using Square Roots · 1

ANSWER

$x = -15$ or $x = 5$

Solving Quadratic Equations Using Square Roots · 4

ANSWER

$x = -10.8$ or $x = 8.8$

Solving Quadratic Equations Using Square Roots · 3

ANSWER

$x = -6$ or $x = -2$

Solving Quadratic Equations Using Square Roots · 6

ANSWER

$x = -9.9$ or $x = 9.9$

Solving Quadratic Equations Using Square Roots · 5

ANSWER

$x = -8$ or $x = 2$

Solving Quadratic Equations Using Square Roots · 8

ANSWER

$x = -9.6$ or $x = -2.4$

Solving Quadratic Equations Using Square Roots · 7

ANSWER

$x = -8$ or $x = -4$

Solving Quadratic Equations Using Square Roots · 9

$3(x - 2)^2 + 12 = 60$

Solving Quadratic Equations Using Square Roots · 10

$x^2 = 73$

Solving Quadratic Equations Using Square Roots · 11

$(x + 3)^2 = 16$

Solving Quadratic Equations Using Square Roots · 12

$(x - 4)^2 = 87$

Solving Quadratic Equations Using Square Roots · 13

$2(x + 7)^2 - 11 = -3$

Solving Quadratic Equations Using Square Roots · 14

$x^2 = 6$

Solving Quadratic Equations Using Square Roots · 15

$(x + 3)^2 = 64$

Solving Quadratic Equations Using Square Roots · 16

$(x + 8)^2 = 38$

Solving Quadratic Equations Using Square Roots · 10

ANSWER

$x = -8.5$ or $x = 8.5$

Solving Quadratic Equations Using Square Roots · 9

ANSWER

$x = -2$ or $x = 6$

Solving Quadratic Equations Using Square Roots · 12

ANSWER

$x = -5.3$ or $x = 13.3$

Solving Quadratic Equations Using Square Roots · 11

ANSWER

$x = -7$ or $x = 1$

Solving Quadratic Equations Using Square Roots · 14

ANSWER

$x = -2.4$ or $x = 2.4$

Solving Quadratic Equations Using Square Roots · 13

ANSWER

$x = -9$ or $x = -5$

Solving Quadratic Equations Using Square Roots · 16

ANSWER

$x = -14.2$ or $x = -1.8$

Solving Quadratic Equations Using Square Roots · 15

ANSWER

$x = -11$ or $x = 5$

Solving Quadratic Equations Using Square Roots · 17

$3(x - 1)^2 + 2 = 77$

Solving Quadratic Equations Using Square Roots · 18

$x^2 = 50$

Solving Quadratic Equations Using Square Roots · 19

$(x - 7)^2 = 16$

Solving Quadratic Equations Using Square Roots · 20

$(x - 9)^2 = 32$

Solving Quadratic Equations Using Square Roots · 21

$4(x - 1)^2 + 7 = 11$

Solving Quadratic Equations Using Square Roots · 22

$x^2 = 23$

Solving Quadratic Equations Using Square Roots · 23

$(x + 7)^2 = 144$

Solving Quadratic Equations Using Square Roots · 24

$(x - 3)^2 = 26$

Solving Quadratic Equations Using Square Roots · 18

ANSWER

$x = -7.1$ or $x = 7.1$

Solving Quadratic Equations Using Square Roots · 17

ANSWER

$x = -4$ or $x = 6$

Solving Quadratic Equations Using Square Roots · 20

ANSWER

$x = 3.3$ or $x = 14.7$

Solving Quadratic Equations Using Square Roots · 19

ANSWER

$x = 3$ or $x = 11$

Solving Quadratic Equations Using Square Roots · 22

ANSWER

$x = -4.8$ or $x = 4.8$

Solving Quadratic Equations Using Square Roots · 21

ANSWER

$x = 0$ or $x = 2$

Solving Quadratic Equations Using Square Roots · 24

ANSWER

$x = -2.1$ or $x = 8.1$

Solving Quadratic Equations Using Square Roots · 23

ANSWER

$x = -19$ or $x = 5$
